

AQ98

LIFEJACKET LIGHT

The smallest lifejacket light in the world, the Aquaspec AQ98 is a compact, tamper proof unit that combines both battery and light source in one. Its unique size and shape, combined with ease of attachment, has made the AQ98 the ideal light for fitment within an inflatable lifejacket. Used extensively in both leisure and commercial applications, AQ98 is also now used by The UK MOD.

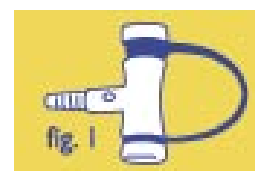

TECHNICAL SPECIFICATION

Activation	Auto On / Man Off
Dimensions	50mm(h) x 25mm(w) x 35mm(d)
Output	0.75cd
Duration	Min 8hrs
Shelf Life	5 Years

INSTRUCTIONS

Operation

1. The AQ98 must be secured to the lifejacket with the switch in the automatic position. Immersion in water will cause the AQ98 to activate (fig 1).
2. To operate the AQ98 manually pull out the security clip & push the switch to the central position (fig 2).
3. It is possible to turn the AQ98 off by pushing the switch to the closed position (fig 3) or simply removing from the water.

Testing

1. Pull out the security clip and push the switch across to the manual (central) position (fig 2).
2. The AQ98 should illuminate.
3. Push the switch back to the Automatic position & replace the security clip (fig 1).

Fitting

Feed clip through lifejacket material or button hole and push back of light and clip together. When fastened the light cannot be removed unless the clip is broken.
